

### Exterior Lamp Switch

- 0 Off-position
- 1 Parking lamps (includes side marker lamps, taillamps, license plate lamps, instrument panel lamps)
- 2 Same as pos. 1 plus headlamps
- 3 Standing lamps, right
- 4 Standing lamps, left
- A Fog lamps (turn to position 2 and pull out to first stop = same as position 2 plus fog lamps).

### Standing lamps

When the vehicle is parked on the street the standing lamps (right or left side parking lamps) can be turned on, making the vehicle more visible to passing vehicles.

The standing lamps can only be operated with steering lock in position 0 or 1.

### Notes:

With the key removed and a front door open, a warning buzzer sounds if the vehicle's exterior lamps (except standing lamps) are not switched off.

Fog lamps will only operate together with low beam headlamps. Fog lamps are turned off automatically when the exterior lamp switch is returned to the off-position.

Consult your state Motor Vehicle Regulations regarding fog lamp operation.
