

- 1 Oil dipstick
- 2 Oil filler cap

### Engine Oil Level Check

The best time to check the engine oil level is when the oil is warm, such as during a fuel stop. With the vehicle on level ground, stop the engine and wait a few minutes for the oil to drain back to the oil pan.

Wipe the dipstick clean before checking.

Add oil, if needed, only to the upper mark (max). Do not overfill the engine.

For viscosity and capacity, see "Fuels, Coolants, Lubricants, etc." and last page.

For low engine oil level indicator lamp, see page 65.
